Who We Are

DADsync is building the Dharmanagar AI & Data Hub - the first hyperscale-ready AI, cloud and data infrastructure in Northeast India. Located in Dharmanagar, Tripura, we bring enterprise-grade compute and storage to the region with data sovereignty and local proximity.

Our Services

- AI Compute - HPC clusters for deep learning, training and inference.
- GPU Cloud - on-demand NVIDIA GPUs for rendering, simulation and parallel processing.
- Enterprise Storage - 1 PB+ object, block and file storage with end-to-end encryption.
- Cloud Infrastructure - microservices, Kubernetes and serverless-ready environments.
- Data Processing - secure, efficient pipelines for massive datasets.
- AI Consulting - expert guidance for ML integration and custom AI solutions.
- Managed Services - 24/7 monitoring, security management and support.

Why DADsync

- Tier-III equivalent reliability engineered for AI workloads.
- 100% data sovereignty - your data stays in India.
- Ultra-low latency for Northeast India and cross-border markets.
- Green energy initiatives and physical & biometric security perimeters.
- Aligned with Digital India initiatives and regional IT policies.

Economic Impact

Direct Jobs	150+
Indirect Opportunities	500+
Regional GDP Contribution	Rs 200 Cr
